SHAAN KHAN

Agentic & Robotic AI Trainer · Geography focus

shaankha81@gmail.com Rajasthan, India · open to remote work

PROFILE

Agentic and Robotic AI Trainer and final-year B.A. student at Maharaja Surajmal Brij University, Bharatpur. Geography is my strongest subject, followed by Sociology and Political Science, with a steady base in mathematics and statistics. I check how AI systems answer, reason and plan, find the exact step where they go wrong, and write clear notes that justify every rating. I review content in English, Hindi and Urdu, including right-to-left Urdu text.

EXPERIENCE

Agentic & Robotic AI Trainer — Current

- **Response evaluation.** Review AI answers on geography and the social sciences for factual accuracy, correct reasoning and clarity, and rate them against project rubrics.
- **Spatial and map-based tasks.** Check directions, distances, scale, layout and whether a described route, scene or object arrangement is physically possible.
- **Visual annotation.** Describe what is visible in an image or scene in a structured, consistent way for annotation.
- **Robotic action sequences.** Review robot task plans step by step: is every step in a workable order, does each step have what it needs before it runs, and does the physics (force, friction, distance, torque) allow it?
- **Error analysis.** Find the first incorrect step in a multi-step answer and classify the error as fact, calculation, units or method, since later mistakes often follow from one early slip.
- **Written justification.** Write short, precise review notes that explain each rating and follow the project guidelines exactly.

SKILLS, IN ORDER OF STRENGTH

1 Geography

Climatology and oceanography (monsoon and jet streams, air masses, fronts, Köppen and Thornthwaite climates, ocean temperature and salinity, tides and currents); Geography of India, world regional geography (Asia, Europe, North America) and Geography of Rajasthan. Practical: map scales and projections (conical, cylindrical, zenithal), Survey of India topographical sheets, prismatic-compass and plane-table surveying, Bowditch correction, choropleth, isopleth and dot maps, GIS and remote-sensing basics.

2 Sociology

Comte, Durkheim, Weber and Marx; Indian society (family, kinship, caste, Sanskritization, globalization, gender, minorities, affirmative action); Indian sociological traditions (Ghurye, Srinivas, Dube, Ambedkar); research design, sampling, interviews, questionnaires and schedules, coding, tabulation and report writing.

3 Political Science

Comparative systems (Britain, Japan, USA, France, China, Nepal, Switzerland, Sri Lanka); the Indian Constitution, Parliament, judiciary, federalism and Panchayati Raj; Western political thinkers from Plato to Marx; international relations since 1945 and India's foreign policy.

4 Mathematics & statistics

Class 10–12 mathematics by self-study, solving in logical order and checking every calculation; mean, median, mode, standard deviation and quartiles; frequency distributions; scale, distance and bearing calculations; statistical diagrams.

5 English

Reading comprehension, following detailed task guidelines, grammar and vocabulary, structured written explanations and report writing. Studied as a subject up to Class XII.

6 Hindi · 7 Urdu

Fluent reading and writing in Devanagari (हिन्दी) and Nastaliq (اردو); reviewing meaning, grammar and natural tone, checking that Hindi, Urdu and English versions say the same thing, and spotting problems specific to right-to-left text. Hindi studied as a subject up to Class XII.

HOW I REVIEW AN ANSWER

- Read the guidelines first and apply them exactly as written, not as I would prefer them.
- Re-do the problem independently (maps, numbers, dates) before looking at the model's solution.
- Check each step on its own; mark the first wrong step and note which later steps are wrong only because of it.
- Watch for answers that look right but use a wrong method, or sound confident while giving a wrong fact.
- Score accuracy, reasoning and clarity separately, then explain the score in one or two sentences.

PROJECT

Personal portfolio with an interactive Geography Lab shaan.shaankha81.workers.dev

HTML, CSS and JavaScript · GitHub · Cloudflare · Google Search Console

- Built the whole site by hand: fully available in English, Hindi and Urdu (right-to-left) with light and dark themes, and accessible by keyboard.
- **Map-projection tool.** Draws 13 projections from my syllabus live (Mercator, stereographic, gnomonic, Bonne, Mollweide and others) with distortion circles and an area-comparison readout.
- **Compass-traverse calculator.** Takes bearings and lengths, works out latitudes, departures and closing error, applies the Bowditch adjustment and plots the observed and adjusted traverse.
- **"Review an answer" tool.** Mirrors AI-training review: find the first wrong step, classify the error and see how a reviewer would rate the response.
- Deployed from GitHub to Cloudflare and verified with Google Search Console.

EDUCATION

Bachelor of Arts — Geography, Sociology, Political Science Final year (pursuing)

Maharaja Surajmal Brij University, Bharatpur · NEP-2020 programme

Geography papers pair theory with practicals kept in an A3 record book and assessed through a written test, field survey and viva voce.

Class XII — Humanities 2023

Sanatan Dharm Shiksha Sadan Senior Secondary School, Dholpur · Board of Secondary Education, Rajasthan

65.20%, First Division · **Geography 83/100, with 30/30 in the practical** · Subjects: Hindi, English, Political Science, History, Geography, and Social Service Plan as an additional subject.

Class X 2021

Ikra Secondary School, Talaiya Road, Dholpur · Board of Secondary Education, Rajasthan

85.83%, First Division · **Mathematics 86/100**

B.A. COURSEWORK, SEMESTERS III–VI

Semester III
Climatology & Oceanography · Geography Practical (diagrams and compass survey) · Classical Sociological Thought · Selected Political Systems

Semester IV
Geography of India · Geography Practical (maps and topographical sheets) · Understanding Indian Society · Indian Political System

Semester V
World Regional Geography · Geography Practical (projections and plane table) · Social Research Methods · Western Political Thinkers

Semester VI
Geography of Rajasthan · Geography Practical (3-D diagrams, zenithal projections, GIS) · Indian Sociological Traditions · International Relations since 1945

LANGUAGES

English (professional) · **Hindi** (हिन्दी) · **Urdu** (اردو)
